## SUMMARY

Brian is a Staff Solutions Engineer with 6+ years of experience leading enterprise Azure, Copilot and GitHub products delivery from discovery and technical scoping through hands-on prototyping, production rollout and adoption. A trusted advisor to C-Suite executives and engineering teams, he ranks among Microsoft's top 10% of performers and supports a \$40M+ annual revenue portfolio serving 5M+ monthly users at 99.9% uptime. He combines full-stack engineering, solution architecture and high-agency leadership to deliver outstanding outcomes in ambiguous environments.

**Agentic & Generative AI:** Multi-Agent Systems, LangChain/Graph, AutoGen, Semantic Kernel, Model Context Protocol  
**AI Engineering:** Python, Typescript, FastAPI, RAG, Embeddings, Vector Databases, SQL, PostgreSQL, Microservices  
**Cloud, Security & Operations:** Azure, AWS, GCP, Docker, Kubernetes (AKS), CI/CD, Evaluation, Monitoring, Debugging  
**Forward-Deployed Engineering:** Agent Orchestration, Workflow Automation, State & Memory Management, Security

## WORK EXPERIENCE

### MICROSOFT

VANCOUVER, BC

#### Staff Solution Engineer – Cloud and AI

Feb 2024 – Present

- Own **end-to-end delivery** for Azure, Copilot, Foundry, Fabric & GitHub products, translating complex enterprise workflows into scoped solutions, clear architecture, and rollout plans from discovery through production adoption
- Personally **write and review production-grade code** for full-stack AI prototypes, microservices, evaluation harness and integrations; debug agent and workflow failures and run successful pilots for production, shortening **sales cycles by 27%** and **increasing deal closure rates by 33%**
- **Own production quality** through tracing, evals, monitoring, production metrics and failure-mode analysis; balance reliability, safety, latency and cost to **accelerate launches by 35%** and **sustain 99.9% uptime** across environments
- Partner across sales, engineering, product, security and customer success teams to communicate technical tradeoffs, delivery blockers and guide production rollouts; **Team lead** for 10 solution engineers, contributing to **SMB and Enterprise deal growth of 24%** and **98% positive customer feedback**
- Codify field problems into reusable architecture, playbooks, and workshops that **reduce customer time-to-value by 40%**; **ranked in the top 10%** across a **\$40M+ portfolio** and **exceeded personal KPIs by 180%**

### VOPAY

VANCOUVER, BC

#### Lead Solutions Engineer – Payments and Cloud

Feb 2023 – Feb 2024

- Led discovery with 70+ monthly prospects, translating payment challenges into prototypes and tailored workflows; **increased conversion rate by 60%** and **reduced sales cycles from 120 to 75 days**
- Built Python and API integration workflows that automated troubleshooting; resolved technical objections and improved implementation, **halving post-sales implementation time** and **reducing support tickets by 40%**
- Turned recurring customer needs into reusable Virtual Labs and Interactive Sandbox Environments used by 400+ prospects, accelerating **time-to-value by 30%** and **contributing to 30% pipeline growth**
- Promoted to Lead in 8 months after driving **\$5M YoY growth** and exceeding **KPIs by 220%**; Led 4 Solutions Engineers across three verticals and signed enterprise partnerships with **Sage, WeBull and Mastercard**

### TRANSCEND

VANCOUVER, BC

#### Technical Co-Founder & CTO

Mar 2020 – Feb 2023

- Co-founded and built a **full-stack product and analytics platform** for 200+ ecommerce clients, **owning product strategy, system architecture and production delivery** from zero to scale
- Developed **product recommendation, ad-spend optimization, product-research solutions** that increased **revenue 85%, deal sizes 60%, retention 50% and engagement 300%**
- Led and mentored offshore engineering team while scaling **ARR past \$1M at 170% YoY growth**; the company and platform was ultimately acquired in a sale to a leading competitor in the ecommerce space

## EDUCATION

### UNIVERSITY OF BRITISH COLUMBIA (UBC) – VANCOUVER

Sep 2015 – Apr 2020

BSc. in Computer Science (CS), Integrated with minor in Neuroscience

GPA 3.9 / 4.0, 5-time Recipient of Dean's Honors List, **Work Authorization: Canadian Citizen (TN Visa)**
